

Dr. Lyudmila Mihaylova is an Associate Professor (Reader in Advanced Signal Processing and Control) with the Department of Automatic Control and Systems Engineering, University of Sheffield, United Kingdom. Her interests are in the areas of autonomous systems, nonlinear filtering, tracking, statistical signal processing and sensor data fusion. Her work involves the development of novel techniques, e.g. for high dimensional problems (including for vehicular traffic flow estimation), localisation and positioning in sensor networks. She is a senior member of the IEEE, Signal Processing Society and a member of the International Society of Information Fusion (ISIF) and an ISIF board member. She has been serving to the scientific community and organising a number of international conferences and symposia.
