

Journal of Advances in Information Fusion

A semi-annual archival publication of the International Society of Information Fusion

Regular Papers

Page

Forty Years of Multiple Hypothesis Tracking 131
Chee-Yee Chong, Los Altos, CA, USA
Shozo Mori, Sacramento, CA, USA
Donald B. Reid, Sunnyvale, CA, USA

Multiple-Hypothesis Tracking and Graph-Based Tracking Extensions 152
Stefano P. Coraluppi, Woburn, MA, USA
Craig A. Carthel, Woburn, MA, USA
Alan S. Willsky, Cambridge, MA, USA

Conditions for MHT to be an Exact Bayesian Solution to the Multiple Target Tracking Problem for Target-to-Measurement Association Hypotheses 167
Lawrence D. Stone, Reston, VA, USA

Three Mathematical Formalisms of Multiple Hypothesis Tracking 176
Shozo Mori, Sacramento, CA, USA
Chee-Yee Chong, Los Altos, CA, USA
Kuo-Chu Chang, George Mason University, Fairfax, VA, USA

On Indistinguishability and Antisymmetry Properties in Multiple Target Tracking 199
Wolfgang Koch, Fraunhofer FKIE, Wachtberg, Germany

Multiscan Implementation of the Trajectory Poisson Multi-Bernoulli Mixture Filter 213
Yuxuan Xia, Chalmers University of Technology, Göteborg, Sweden
Karl Granström, Chalmers University of Technology, Göteborg, Sweden
Lennart Svensson, Chalmers University of Technology, Göteborg, Sweden
Angel F. García-Fernández, University of Liverpool, Liverpool, U.K.
Jason L. Williams, Queensland University of Technology, Brisbane, Australia
