

Journal of Advances in Information Fusion

A semi-annual archival publication of the International Society of Information Fusion

Regular Papers	Page
Partitioned Update Kalman Filter	3
<i>Matti Raitoharju, Tampere University of Technology, Finland</i>	
<i>Robert Piché, Tampere University of Technology, Finland</i>	
<i>Juha Ala-Luhtala, Tampere University of Technology, Finland</i>	
<i>Simo Ali-Löytty, Tampere University of Technology, Finland</i>	
Sigma-Point Filtering and Smoothing Based Parameter Estimation in Nonlinear Dynamic Systems	15
<i>Juho Kokkala, Aalto University, Finland</i>	
<i>Arno Solin, Aalto University, Finland</i>	
<i>Simo Särkkä, Aalto University, Finland</i>	
On the relation between Gaussian process quadratures and sigma-point methods	31
<i>Simo Särkkä, Aalto University, Finland</i>	
<i>Jouni Hartikainen, Rocsole Ltd., Finland</i>	
<i>Lennart Svensson, Chalmers University of Technology, Sweden</i>	
<i>Fredrik Sandblom, Volvo Group, Sweden</i>	
Nonlinear Kalman Filters Explained: A Tutorial on Moment Computations and Sigma Point Methods	47
<i>Michael Roth, Linköping University, Sweden</i>	
<i>Gustaf Hendeby, Linköping University, Sweden</i>	
<i>Fredrik Gustafsson, Linköping University, Sweden</i>	
The Smart Sampling Kalman Filter with Symmetric Samples	71
<i>Jannik Steinbring, Karlsruhe Institute of Technology (KIT), Germany</i>	
<i>Martin Pander, Karlsruhe Institute of Technology (KIT), Germany</i>	
<i>Uwe D. Hanebeck, Karlsruhe Institute of Technology (KIT), Germany</i>	
Sigma-Point Set Rotation for Derivative-Free Filters in Target Tracking Applications	91
<i>Jindrich Duník, University of West Bohemia, Czech Republic</i>	
<i>Ondrej Straka, University of West Bohemia, Czech Republic</i>	
<i>Miroslav Šimandl, University of West Bohemia, Czech Republic</i>	
<i>Erik Blasch, Air Force Research Lab, USA</i>	
Volumes 1–10 Index	111
